Topic name: Myths or truth?

Titanic sinking prediction explained

1898 mein writer morgan Robertson ke dwara likha gaya ek aisa novel jisme the unsinkable ship 'the titanic' ke sink hone ki prediction pehle se hi apne novel mein kardi thi. Morgan ne apne novel, jiska naam tha the wreck of the titan mein kuch iss tarah se ek ship ki kahani ko bayaan kiya tha jo north atlantic ke ocean mein ek ice berg ke sath takraane ke kaaran samudra ki gehrayiyon mein jaa doobi thi. Uss ship mein kareeb 2200 passengers travel kar rahe the jismein se aadhe logo ki maut ho gyi thi Aur theek 14 years saal. Baad hi the great titanic 1912 mein duniya ke samne introduce ki gayi. Jo ki hubahu usi tareeke se usi jagah par doobi aur itna hi nahi balki titanic mein recorded passengers ki sankhya bhi kul milakar 2500 thi. Isn't it shocking ki kisi insan ne sirf ek idea ke chalte ek bahut badi tragedy ko predict kar diya. Ye porri information mein agar aap similarity dhundh paa rahe hai to main aapka ye myth abhi crack kar deta hu. Jaise simpsons show mein humein kayi aise incidents dekhne ko milte hain jo ki real life mein bhi happen hote hain kuch isi tarah se iss novel ko bhi writer morgan ne apni ek umda imagination ko dhyan mein rakhte huye likh dala par scientifically dekha jaye to ye itni haerani wali baat nahi hai kyuki ye ek simple si story hai jo ki ek aam insan bhi likh sakta hai. Titanic se related kayi theories bhi judi hain par kya hum unhe sach maante hain? Nahi kyuki the world knows ki titanic ek choti si galti ke chalte doob gaya. Jab titanic uss iceberg ki or badh raha tha tab usska signal misinterpret ho gaya jiss karan crew members ne right ki jagah left turn le liya aur titanic seedha us iceberg se takra gaya aur agar titanic ko aage na badhakar usey vahi rok diya jata to vo itni jaldi nahi doobta, aur history kuch aur hi hoti kayi zindagiyo ko bhi bachaya jaa sakta tha par destiny ko ye manzoor nahi tha.

Pyramids temperature explained

Pyramids egypt ke registan ke ilake mein sthit aise masterpiece hain jinhe banane wale humans nahi balki extra terrestrial creatures yaani aliens hain. Pyramids ke andar ka definite aur constant temperature 20 degree celsius record kiya gya Bhale hi bahr kitna bhi hot temperature ho fir bhi duniya ka har pyramid andar se 20 degree temperature par hi rehta hai na usse kam na zyada. Ye sunne mein hi kisi insaan ki intelligence ka creation nahhi lagta ab ek major question yaha ye stand karta hai aakhir aisi kaunsi technology, magic ya science ki understanding centuries ago logo mein thi jisne pyramids ke temperature ko ek jaisa rakhne ka kaam kiya. Ye myth finally tab proof hua jab scientists ki research ke dauraan unhone discover kiya ki pyramids ko construct hi uss treeke se kiya gya tha ki unmei insulation bana rahe, pyramids mein proper ventilation work karta hai par fir bhi unmein na bahr ki hawa andar aa sakti hai aur na andar ki bahr jaa sakti hai. iske alawa Ek interesting fact ye hai ki sabse zyada pyramids egypt mein nhi balki sudan mein hain aur har ek main pyramid ke top par ek mini gold pyramid locate kiya gya tha jiske kaaran pyramids ko space se bhi dekha ja sakta tha. Pyramids ko asal mein hum ground level se dekhte hain isiliye vo humein pointed nazar aate hain par you'll be shocked to know ki pyramids asal mein top se flat hai na ki pointed.

Island made of dead bodies

Dosto duniya islands to apne bahut dekhe honge. Earth par officially 900,000 islands hain. Normally islands volcanic eruption ki wajah se create ho jate hain. Ya fir agar earthquake jaisi koi major calamity happen ho jaye tab islands khud create hote hain aur kayi baar gumnaam reh jate hain. Par kya aap mera vishwas karenge ki ek aisa island bhi hai jo human dead bodies se bana hua hai. Agar iss island ko kahi se bhi khoda jaye to iski zameen se human bones milengi. Italy ke Venice mein world famous islands ke beech ye ek aisa island hai jahan par kabhi life exist kiya karti thi par ab vo poori tarah abandoned hai aur iss island par visitors ka jana saaf mana hai aur isey duniya ki most haunted place ka naam diya gaya hai iss island ka naam hai Poveglia,. Mana jata hai ki plague ki mahamari ke time par yaha patients ki body ko laakar dafna diya jata tha ya fir jala diya jata aur unmei se kayi logo ko zinda dafna diya jata tha. Kareeb 55000 dead bodies iss island par laakar chorh di gayi. Ab iss island par un plague patients ki spirits bhatakti hain. 2014 mein iss island ko ek businessman dwara own kar liya gaya aur yaha ek big hotel project execution plan kiya gaya par unka ye project govt ki taraf se beech mein hi rok diya gaya.
